EDUCATION

Dayananda Sagar College of Engineering - Visvesvaraya Technological University (VTU) CGPA 9.0/10.0
Bachelor of Engineering in Computer Science and Design

EXPERIENCE

stockinsights.ai | Software Development Engineer (SDE) Aug 2024 - Present

- Architected a production-grade, multi-session AI chat system using **Vercel AI SDK**, **PostgreSQL**, and **Drizzle ORM**, reliably handling **20,000+** conversations with improved concurrency control and reduced cold-start latency.
- Designed and shipped a **RAG pipeline** for financial filings using vector embeddings + GPT-4o-mini, cutting analysis time from minutes to seconds and auto-summarizing **25,000+ filings monthly**.
- Led and owned the entire StockInsights frontend, responsible for code architecture, core user flows, and UI performance using **Tailwind** and **Figma**. Improved LCP by optimizing image loading, layout stability, and critical rendering paths.
- Implemented end-to-end API **monetization** infrastructure using **Stripe** checkout, metered billing, and automated **webhooks**, enabling the company's first recurring API revenue stream exceeding **5 LPA**.
- Built a secure OTP verification and real-time **WhatsApp alert system** with rate limiting and cron-based automation, processing **2,000+** messages daily under high user load.
- Migrated **full-text search** from MongoDB Atlas to PostgreSQL, redesigning search strategies for large financial documents and delivering **120% faster search performance** with more accurate filtering, consistent relevance scoring, and reducing infrastructure costs by **USD 5,000+ annually**.

TECHNICAL SKILLS

Languages : Python, TypeScript, JavaScript
Backend : Node.js, Express.js, REST, GraphQL
Frontend : React.js, Next.js, Tailwind CSS, Zustand
Databases : PostgreSQL, Drizzle ORM, MongoDB, Redis, Pinecone
AI/LLM : RAG, Vercel AI SDK, Context Engineering, Langchain, Langraph
Tools: Git, GitHub, Docker, Postman
Platforms: AWS, Vercel, Linux, Azure

PROJECTS

A/B Tester | TypeScript, NextJS, Canvas API, Vercel [Repository](#) | [Live Demo](#)

- Conceptualized and launched a developer-focused A/B testing tool that achieved **Top 30** Product of the Week status on Peerlist, garnering **40+** organic upvotes and immediate community adoption within the first week.
- Architected a client-side rendering engine using Next.js 15 and the HTML5 Canvas API, enabling sub-second image generation without server-side processing, effectively reducing infrastructure costs to \$0.
- Managed the project's open-source lifecycle for **Hacktoberfest 2025**, overseeing code quality for 3 merged features and building a community of **25+** stargazers.

ProductOwl | Next.js, TypeScript, BrightData, Cheerio, MongoDB [Repository](#) | [Live Demo](#)

- Built a scalable **web scraping system** using BrightData + Cheerio to extract structured product data from Amazon.
- Automated scheduled price monitoring with Cron Jobs, enabling real-time detection of pricing changes.
- Implemented an email alert workflow that increased repeated-user engagement and retention.

EXTRA-CURRICULAR

Open Source Contributions

- Contributed multiple merged pull requests improving React-based UIs/, Python Backends across open-source repositories with **17,000+ combined stars**. [PR Summary](#)
- Active **Hacktoberfest 2023 and 2025 contributor**, collaborating with distributed teams on feature development, bug fixes, and code quality improvements.

Achievements

- Awarded **Best Project Presentation** at the college Open Day for building **GIST-3DR**, a production-ready generative implant segmentation system with integrated 3D and AR visualizations for dental implant planning. Repository: [here](#)

Certifications

[View Certificate](#)

- Demonstrated strong understanding of **Git and GitHub fundamentals** including branching strategies, pull request workflows, collaboration, and secure version control practices.
